Description

Accenture Recruitment 2024

About Accenture

At Accenture, we transform businesses and people with the power of digital technology. We are a global professional services company with leading capabilities in digital, cloud, and security. We combine unmatched experience and specialized skills across more than 40 industries to help clients succeed in their journeys of transformation.

Why Join Us as an Embedded Software Engineer?

Shape the future of technology! As an Embedded Software Engineer at Accenture, you'll play a pivotal role in developing and implementing innovative software for intelligent devices that are revolutionizing our world.

This remote position offers the flexibility to work from anywhere, allowing you to contribute your expertise while maintaining a work-life balance that suits you. You'll collaborate with a talented team of engineers on cutting-edge projects, constantly learning and expanding your skillset.

Position: Embedded Software Engineer (Remote)

Company: Accenture

Location: Remote

Job Summary

We are seeking a passionate and detail-oriented Embedded Software Engineer to join our growing team. You'll be responsible for the entire software development lifecycle for embedded systems, from design and coding to testing and deployment. You'll work closely with hardware engineers to ensure seamless integration and functionality of the software within the final product.

This role is ideal for someone with a strong foundation in embedded systems programming and a desire to push the boundaries of technology. You'll have the opportunity to work on a variety of exciting projects, from developing software for medical devices to creating intelligent systems for the Internet of Things (IoT).

Accenture Careers

Key Responsibilities:

- Design, develop, and implement embedded software for a variety of devices and systems.
- Write clean, efficient, and well-documented code adhering to best practices.
- Collaborate with hardware engineers to understand system requirements and ensure software-hardware integration.
- Perform unit testing, integration testing, and system testing to ensure software quality and functionality.
- Debug and troubleshoot software issues to identify and resolve problems effectively.
- Stay up-to-date with the latest trends and advancements in embedded systems technology.
- Participate in code reviews and provide constructive feedback to improve code quality.
- Document software design, development, and testing processes for future reference.

Required Skills and Qualifications:

- Bachelor's degree in Computer Science, Electrical Engineering, or a related field.
- Minimum 2+ years of experience in embedded systems development.
- Proficiency in C/C++ programming languages.
- Strong understanding of embedded systems architecture and real-time operating systems (RTOS).
- Experience with debugging tools and techniques for embedded systems.
- Excellent analytical and problem-solving skills.
- Strong communication and collaboration skills.
- Ability to work independently and manage multiple tasks effectively.

Experience:

This role is open to both experienced Embedded Software Engineers and talented individuals with a strong academic background who are eager to launch their careers in this exciting field.
