Description

Capgemini Recruitment 2024

We are seeking a highly motivated and skilled AWS Solutions Architect to join our growing Cloud Data Platforms team. In this role, you'll be responsible for designing, architecting, implementing, and managing secure, scalable, and cost-effective cloud solutions on AWS for our clients. You'll leverage your deep understanding of AWS services and best practices to develop innovative solutions that meet our clients' unique business needs.

Capgemini Careers

Responsibilities:

- Collaborate with clients and internal teams to understand their business needs and translate them into technical requirements for cloud solutions on AWS.
- Design and architect secure, scalable, and cost-effective cloud solutions on AWS, leveraging best practices and adhering to security and compliance standards.
- Select and implement appropriate AWS services for each project, including compute, storage, networking, database, analytics, and security services.
- Develop and document cloud infrastructure as code (IaC) using tools like AWS CloudFormation or Terraform.
- Automate infrastructure provisioning and deployment using DevOps methodologies and tools.

- Configure and manage cloud security using AWS security services like IAM, S3 bucket policies, and VPC security groups.
- Monitor and optimize cloud infrastructure for performance, scalability, and cost-efficiency.
- Stay up-to-date on the latest AWS technologies, services, and best practices.
- Participate in knowledge sharing sessions and mentor junior team members.
