Capgemini Careers

Responsibilities:

- Develop and implement responsive and visually appealing user interfaces.
- Collaborate with design teams to translate wireframes and mockups into interactive web applications.
- Ensure the seamless integration of front-end components with back-end services.
- Work closely with back-end developers and other stakeholders to ensure a cohesive and integrated development process.
- Participate in agile development methodologies, contributing to sprint planning and review sessions.
- Provide technical guidance and mentorship to junior developers.
