Description

Data Engineer

We are seeking a talented and passionate Data Engineer to join our growing team and play a key role in building and maintaining our data pipelines. You will be responsible for designing, developing, and implementing solutions to efficiently extract, transform, and load data from various sources to support our business intelligence and analytics needs. This is an exciting opportunity to work with cutting-edge technologies and contribute to the success of a global IT leader.

Infosys Careers

Responsibilities:

- Design and develop data pipelines using technologies like Python, Spark, Kafka, and cloud platforms (AWS, Azure, GCP).
- Implement data quality checks and data cleansing techniques to ensure data integrity and accuracy.
- Monitor and troubleshoot data pipelines to identify and resolve issues proactively.
- Collaborate with data analysts, scientists, and business stakeholders to understand data needs and translate them into technical solutions.
- Stay up-to-date with the latest advancements in data engineering tools and technologies.
