Description

Google Recruitment 2024

Do you thrive in building innovative solutions that connect disparate systems and data sources? Are you passionate about creating a seamless and efficient flow of information across an organization? If so, then a career as a Mulesoft Developer at Google could be the perfect fit for you!

Why Google?

At Google, you'll have the opportunity to work on some of the most challenging and impactful projects in the world. You'll collaborate with a team of brilliant minds who are constantly pushing the boundaries of what's possible. Google fosters a culture of innovation, learning, and growth, and you'll be encouraged to develop your skills and expertise.

Join us as a Mulesoft Developer (Remote)

In this exciting role, you'll play a key role in designing, developing, and maintaining integration solutions using the Mulesoft Anypoint Platform. You'll work closely with cross-functional teams to understand business needs and translate them into robust and scalable integrations.

Job Summary

As a Mulesoft Developer at Google, you'll be responsible for the entire lifecycle of

Hiring organization
Google

APPLY NOW

integration development, from design and development to deployment and maintenance. You'll leverage your expertise in the Mulesoft Anypoint Platform to build APIs, connect applications, and automate data flows. You'll also be responsible for troubleshooting and resolving integration issues, ensuring the smooth operation of our systems.

Key Responsibilities

- Design, develop, and deploy integration solutions using Mulesoft Anypoint Platform components, including Mule ESB, API Manager, CloudHub, and DataWeave
- Collaborate with business analysts and solution architects to understand integration requirements
- Develop reusable and maintainable integration flows
- Implement error handling and logging mechanisms
- Perform unit and integration testing
- Monitor and troubleshoot integration issues
- Stay up-to-date on the latest Mulesoft technologies and best practices

Required Skills and Qualifications

- Proven experience in designing, developing, and deploying integration solutions
- Experience with the Mulesoft Anypoint Platform (Mule ESB, API Manager, CloudHub, DataWeave)
- Strong understanding of integration concepts and principles (APIs, SOA, Microservices)
- Experience with XML, JSON, and other data formats
- Experience with web services (SOAP, REST)
- Experience with CI/CD pipelines
- Excellent problem-solving and analytical skills
- Strong communication and collaboration skills

Experience

This role is open to both experienced Mulesoft developers and talented individuals with a strong foundation in integration concepts and a desire to learn the Mulesoft platform.
