Description

Infosys Recruitment 2024

Are you passionate about ensuring excellence? Do you thrive in a collaborative environment where your ideas can shape the future? If so, then a career as a Quality Engineer at Infosys could be the perfect fit for you.

Infosys Jobs Near Me

Infosys is a global leader in consulting, technology, and outsourcing. We empower clients to navigate their digital transformation journeys with a relentless pursuit of innovation. As a Quality Engineer at Infosys, you'll play a vital role in upholding our commitment to exceptional quality. You'll be part of a dynamic team, working on cutting-edge projects, and shaping the future of quality assurance.

Summary

In this role, you'll be responsible for designing, developing, and executing comprehensive quality assurance (QA) plans. You'll work closely with developers, product managers, and other stakeholders to identify and eliminate defects throughout the software development lifecycle (SDLC). Your analytical skills and attention to detail will be crucial in ensuring our products and services meet the highest standards.

(adsbygoogle = window.adsbygoogle || []).push({});

Key Responsibilities

- Design, develop, and execute comprehensive test plans aligned with project

requirements and industry best practices.

- Conduct various types of testing, including functional, non-functional, usability, and regression testing.
- Utilize automation tools and frameworks to streamline the testing process and improve efficiency.
- Analyze test results, identify defects, and document them in a clear and concise manner.
- Participate in code reviews and provide constructive feedback to developers.
- Collaborate with cross-functional teams to resolve quality issues and ensure timely delivery.
- Stay up-to-date on the latest trends and best practices in software testing.
- Continuously improve testing processes and methodologies for enhanced quality assurance.

Required Skills and Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent experience).
- Minimum 1 year of experience in software testing (for experienced candidates).
- Strong analytical and problem-solving skills.
- Excellent attention to detail and a commitment to quality.
- Proficient in manual testing methodologies (black-box testing, white-box testing, etc.).
- Working knowledge of automation testing tools (e.g., Selenium, Appium) is a plus.
- Excellent communication, collaboration, and interpersonal skills.
- Ability to work independently and as part of a team.

Experience

This role is open to both freshers and experienced professionals. For freshers, a strong academic background in computer science or a related field, coupled with a keen interest in quality assurance, is a plus. Experienced candidates with a minimum of 1 year of software testing experience will be highly considered.
